

## Procedure for CS2040C midterm quiz S1 AY20/21

1) Study all Week 01-05 material + (tut/lab on Week 06), from “basic C++” to Priority Queue ADT

2) Paper + ans\_blank.txt are released as a password protected zip file on **Tuesday, 29 September 2020, 6pm SGT**, please download it early, latest by **Wednesday, 30 September 2020, 9.50am SGT**. If lumiNUS goes down after **Wednesday, 30 September 2020, 9.50am SGT**, we assume that all of you already have the paper

3) No virtual background, make sure camera shows your face, surrounding and screen as per the NUS e-exam proctoring set up

4) You may use printed materials and softcopy PDF-only notes on your local drive. **NO** reference to **electronic materials** (except PDF on your local computer). **Calculator (electronic or physical) is allowed but not going to be that helpful. You can choose to PDF-ed the entire cppreference (local copy) and/or any demo code/PS1-2-3 code if that is your strategy (we are not going to allow you to open any IDE (local or online) to test anything related to C++).**

5) Be in the waiting room on time, as students will be admitted one by one. Matric card must be presented upon admission.

6) Join through a phone camera (sideview display) and through your computer for communication purposes (zoom chat) but the **computer camera should be turned off**.

7) When you are entering a zoom meeting, name your devices according to these "[PC] MatricNum Name" for your computer device and "MatricNum Name" for your proctoring device. Ensure you know how to do this **beforehand**.

8) Check they you have closed all other applications except:

Zoom                  Adobe Reader                  Text editor\*

\* - Text editor must be equivalent of notepad / TextEdit and work with plain text. No syntax highlighting / autocomplete (and obviously it should not be able to do test compile/test run a C++ code)

9) When you get the password around 5 min before start time and unlock the Question Paper, you are only allowed to read the green pages (first 2 pages) but **NOT** supposed to scroll down to the questions until you are given permission to do so. If you do not follow, it will be deemed as a form of cheating, so please take this instruction **seriously**

10) Create a copy of the answer file (i.e., the ans\_blank.txt) and name the copy to **NUSNET\_ID.txt**, you should not have your name on your answer file name. Please know the difference between your matric card number (aka student number) vs. NUSNET ID

11) Instructions in the questions will be split into "INLINE" (single line) vs "MULTILINE", as there are some auto-crawling script to get your solutions. Please follow the instructions, if the script is unable to parse the answer, or it does not get a satisfactory result for Q0, it will NOT be graded

12) If you need to leave / toilet break, zoom chat the invigilator twice: **before leaving** AND **once you return**. Ensure you have permission to leave before leaving (we will NOT give you extra time for this)

13) When time is up, please stop writing, no reason to risk that 1 or 2 marks for your whole paper. **DO NOT TURN OFF SCREEN RECORDING YET**. Upload the text file into the luminus folder

14) In the event that LumiNUS is down, your invigilator will inform you who to email the *NUSNET\_ID*.txt file to

15) YOU ARE NOT SUPPOSE TO LEAVE BEFORE YOU'RE TOLD TO DO SO, SO WHEN YOU ARE DONE, PLEASE DO NOT USE YOUR PHONE OR ANY COMMUNICATION DEVICES, JUST **press the yes** check mark (nonverbal reaction) and **WAIT FOR FURTHER INSTRUCTIONS**
